דובר של 'נקים'

re: An other try of debunking for nakim.org and this time by Flora Teoh linked to the s/Carnegie eugenics network well known for spreading FAKE SCIENTIFIC NEWS twork of paid and corrupted Fact Checkers as we will see in my answer.

le:  
of 30000 M.Ds presented our analyses for challenging the vaccination campaign in ort in francesoir.fr and Nexus youtube channel here.

update:  
ked the debunkers the article of Jean-François Cliche lesoleil.com and the one of l network debunking in french below, and in english here.  
sion: LeSoleil/Jean-François Cliche+Msn/Dan Satherley=Bill Gates=FAKE NEWS ple to take the shot.

הצטרף: 23 ינו' 2006  
הודעות: 914

update:  
s been published first in hebrew here  
terview in French to francesoir.fr who translated it in french here  
well reported in russian here in english in Arutz 7 here and in the U.S here  
n several other language including greek here  
not be debunked since it is based on real data that have been exposed but since its Israeli ministry of health and the Pfizer/Moderna coalition keep trying to deceive the ed "scientific" article (like the new england journal of medicine)that intentionally ovid sickness two weeks after the 2nd shot and hide the most important data that is ers among the vaccinated people from covid and other adverse effects after the ct that Dr Ran Balicer the corresponding author of the NEJM publication, works for

h department as head of the Klalit research institute and received grants from Pfizer  
as well as 7 other co-authors of the publication.. see here

iked the NEJM study please read our article, their datas validate our analysis and  
increase of Covid19 after first shot, here:  
tions in the NEJM scientific publication on the efficiency of Pfizer's vax

Disclosures should be provided for all funding sources, including Pfizer, outside the submitted work; .

of the vaccination data in Israel reveals a frightening picture

r of an article promoting COVID-19 vaccination enable to uncover all vaccination  
frightening situation

2021 Ynet (the most known Israeli News website) published a confused and  
entitled "Vaccination efficiency data in Israel, and its rapid effects on the young".

of these data explain why during the massive vaccination project initiated mid-  
December during a confinement, daily new confirmed COVID-19 cases failed to decrease as  
during confinements, and, more importantly, why numbers of serious, critical and death  
cases during that period that covered at least one month. From mid-December to mid-  
January (2 months), 2337 among all Israeli 5351 official COVID-deaths occurred. Our analyses  
showed a significant increase in death rates during the 5-week long vaccination process,  
both among the unvaccinated and those after completing the vaccination process. Presumably,  
deaths before vaccination, and those infected shortly after the 1st dose, tend to  
show more severe symptoms than those unvaccinated.

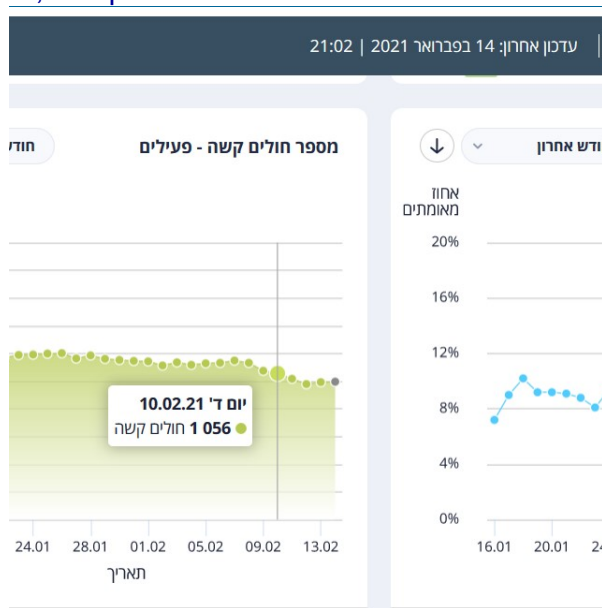

The article is organised in an exciting way and uses data provided in an erroneous way by the  
Ministry of Health. It is unclear whether this was intentional to prove the vaccine's efficiency or if  
it was done erroneously because the provided data were misunderstood. Note that in Israel, all  
deaths are attributed to Pfizer.

An important example from the article, in relation to the table provided by the Ministry  
of Health, is the text "However, 546 among the dead were such that were not at all vaccinated  
or received a vaccination dose within two weeks before their death" differs from the table. This is  
evident because all data presented in the table and provided below describe only  
patients that got at least the first vaccination dose. This is clear from examining the  
total number of COVID patients who got the first or the second vaccine dose.  
Out of 660 deaths, 546 got only the first dose.

Instead of indicating the vaccine's adverse effects in the table, rather than indicating the vaccine efficiency, indicate the vaccine's adverse

<b>3</b>	<b>461</b>	<b>406</b>	<b>1031</b>	<b>220</b>	<b>660</b>	<b>43871</b>

e we need first to understand that the provided table describes the state of  
 nts that got the first or the second vaccine dose at given dates, as started in the  
 ges from the data that among 856 patients above 60 years in serious state  
 his time..." we assume that the article published February 11 reflects the situation  
 previous day, hence February 10 2021, or February 11 2021.  
 ), the number of serious active cases was 1056 according to the control panel of the  
 th, see photo below.

y shows that most serious hospitalized cases on February 10 or at a near date were  
 æd with the first dose or up to two weeks after the second dose. See the table of the  
 ents showing 1031 serious and 220 critical cases at the time the table was done.  
 re article in hebrew from February 1st 2021 "Can one show that the vaccine from  
 ; major cause for high death rates in Israel and the world?".  
 ; not the last surprise we get from examining the data from the Ministry of Health.  
 ict the number of people with the first vaccine dose on January 19 2021 from that on  
 21. During these 21 days, 1331881 Israeli citizens got the first dose. The table  
 among these died, hence 0.042% and that 39047 among them became a  
 ;, hence 2.9 %.  
 se we focus on data specific to two weeks after the 2nd vaccination according to the

6 to February 10 2021 909102 Israeli citizens got the 2nd vaccine dose. Among  
y to the table, 92 died, 0.01%.

he 5 weeks since the first dose at least 0.05% of first dose recipients died. This  
es mainly to a relatively young population whose vaccination started on January 19,  
which most vaccinated were below 65.

nate the death rate of those above 65 which were mostly vaccinated before that  
ata reported by the USA-based VAERS,

I, [see article in english](#), that the ratio of deaths by those above 65 vs those below 65  
55/35). Hence the death rate of those above 65 between the first and the second  
e should be until January 19 0.042 (the death rate of those below 65) multiplied by  
n 0.186%, which is close to the 0.2% reported by the Ministry of Health on January

2 % death has been mysteriously modified later on by the Ministry of Health and  
0.005 without any explanation, [see article in hebrew](#). Above considerations show  
ate data provided first were correct, the updated death rate data might have been  
gest lower death rates among the elderly.

do not end here.

COVID-19 deaths among the vaccinated since the start of the vaccination action  
in the increased death rates from COVID-19 observed since December 2020.  
e, we calculate the products of the number of vaccinated people above age 65 by  
nber of vaccinated people below 65 by 0.04. This shows that most COVID-19  
eriod are for vaccinated people, as shows the table provided by the Ministry of  
ginning of February.

ination action from mid-December until mid-February, 2337 among all 5351  
hs reported for Israel occurred, 43.7%. Among these, since January 19, 1271  
hs were reported for Israel. The table provided by the Ministry of Health on February  
COVID-19 deaths among the vaccinated, 51.9% of the deaths for that period. Only  
eli, among 8 million (about 1 in 8, 12.5%), were vaccinated during that period.  
ccination promotes deaths because 51.9% of deaths during that period are for the  
ed in that period. In addition the serious and critical cases during that period is more  
ad serious cases, the adverse effect of the vaccination process is most likely worse  
ars from the data at hand.

inues. The deaths among those vaccinated should be added to the numerous AVC  
nts reported just after vaccination that are not included among COVID-19 deaths  
uble the deaths among those vaccinated, whose numbers remain unknown and  
y to find in the coming days.

state that vaccinations caused more deaths than the coronavirus would have  
e period.

ccinated and above 65, 0.2% of those vaccinated died during the 3-week period  
, hence about 200 among 100000 vaccinated. This is to be compared to the 4.91  
0000 dying from COVID-19 without vaccination, see below. This should not be  
ne COVID-19 0.279 deaths among 100000 reported for those who completed the  
cess, meaning 2 weeks after the second dose, see below table from the Ynet

## נפטרים מקורונה

מחוסנים לחלוטין (שיעור ל-100 אלף איש)	לא מחוסנים (שיעור ל-100 אלף איש)	גיל
אין	0.01	15-44
0.0196	0.19	45-65
0.279	4.91	65+

inated 000	Vaccination complete per 100000	Efficiency
	None	-
	0.0196	89.7%
	0.279	94.3%

ire also extends to those below 65, among which, for the 5 weeks during the vaccination process 0.05%, meaning 50 among 100000, died. This is to be compared to 100000 dying from COVID-19 and that are not vaccinated in that age group, as per the evidence since the death rate of this age group increased by 260 during this 5-week period of vaccination process, as compared to their natural COVID-19 death rate.

to pass these points across relate to the monthly COVID-19 deaths rates since the start of the pandemic and until mid-December, 3014 deaths, hence  $3014/9 = 334.9$  deaths per month. The death rates since mid-December are  $2337/2 = 1168.5$  deaths per month, hence 3.5 times more.

at the Pfizer vaccines, for the elderly, killed during the 5-week vaccination period more people than the disease itself would have killed, and about 260 times more people died from the disease among the younger age class. We stress that this is in order to produce a vaccine that is valid at most 6 months, and promote Pfizer sales.

and numbers of deaths from the vaccine are probably much lower than actual numbers. The statistics accounts only for those defined as COVID-19 deaths for that short time period and not for other AVC and cardiac (and other) events resulting from the inflammatory reactions in the elderly, as documented on the NAKIM site, which themselves are only the iceberg's tip, [see here](#).

account for long-term complications described in a criminal complaint filed in France and which was translated to english, [see here](#).

This explains why the serious COVID-19 cases increased as vaccination started, and why they started to decline when vaccination was opened to the young and continue to decline as the national campaign is losing its momentum.

This massacre will not include those below 13, as these have an increased adverse reaction rate, including death, to vaccines as shown by multi-decennial data from the VAERS database in the USA.

It is predicted that the pandemic may be predicted for the coming weeks. The decrease in the number of deaths in vaccination age will cause a decrease in serious cases, mainly not because of the vaccine, but because fewer people will die from the vaccine and other causes.

3 reactions.

porary as in a few months we expect to face mid- and long-term adverse effects of as ADE (Antibody-dependent Enhancement) and the vaccination-resistant mutants vaccines. But this should occur after the soon coming elections and the (survivor) ve another opportunity to express their disappointment at the voting poll.

ervé Seligmann for his huge support on data analysis.

חן et Haim Yativ

ceSoir

הצטרף: 23 ינו' 2006  
 הודעות: 914

Haim Yativ, ingénieur, et du docteur Hervé Seligmann, de l'unité de recherche sur les maladies émergeantes et tropicales émergentes de la faculté de médecine de l'université d'Aix-Marseille. Haim Yativ et le Dr Seligmann ont analysé les données vaccinales d'Israël dans un article publié sur le site Nakim.org.

FranceSoir et l'association Bon Sens sont très attachés aux publications, et se sont appuyés sur les données, du retour d'expérience des divers pays sur la vaccination, et se sont appuyés sur l'article. Nous avons demandé à les interviewer afin de comprendre leur analyse et leurs conclusions.

L'article déclare n'avoir aucun conflit ou lien d'intérêt, autre que celui d'avoir des accès à des données.

L'article, qui, après une présentation, évoque leur analyse des données, les limites, les limitations et surtout les conclusions qu'ils demandent à confronter aux données via une requête au ministère de la Santé, par le biais de l'équivalent de la Commission d'accès aux documents administratifs) israélienne.

Les données sont simples :

La comparaison entre les données publiées par les autorités et la réalité sur le terrain.

Les sources d'information, outre les emails et messages d'effets secondaires qu'ils ont reçus, sont basés sur des biais d'internet.

Ces données sont Ynet, site d'information israélien, la base de données du ministère de la Santé et la base aux Etats-Unis du VAERS (effets secondaires).

En Israël, il y a 3000 enregistrements d'effets secondaires des vaccins dont 2900 pour les enfants.

Comme dans d'autres années, la mortalité est 40 fois supérieure.

L'article de Ynet, présente des données liées à la vaccination. Les auteurs de l'article ont "junké" cette analyse, en se basant sur les données publiées par Ynet.

Les données en regardant la mortalité pendant la période de la vaccination qui dure 5 semaines. En analysant ces données, on arrive à des chiffres effarants qui donnent une mortalité de 40 fois supérieure au vaccin. »

clarent « que les vaccinations ont causé plus de décès que le coronavirus n'en pendant la même période. »

Dr Seligmann déclarent que pour eux « ceci est une nouvelle Shoah » devant la autorités israéliennes pour vacciner les citoyens.

les spécialistes à venir compléter leurs analyses, et entendent donner des suites de découverte, si elle venait à être validée par les données du ministère : contacté, it pas disponible...

rélation entre la montée de la mortalité et le début de la campagne de vaccination

*ici la courbe de mortalité COVID19 en Israël, effectivement la 3ème vague est meurtrière, et pourrait coïncider avec le début de la vaccination en Israël.*

*En fait, la vaccination a commencé le 19 décembre, les cas avaient déjà bien augmenté avant et on sait que c'est exponentiel à partir de là si on ne fait rien."*

Since Mr Kouts il n'y a rien de prévisible dans une épidémie c'est le prof Raoult qui le  
 prouve que vous avez tort je vous ramène deux graphes l'un montrant que le 19.7.2020  
 il y avait 76 malades dans un état grave qui a ensuite décliné et qui ne représente en rien  
 une épidémie

façon les 68 malades graves en date du 19.12.2020 date du début de la vaccination absolument pas un signe de début de pic d'autant que c'est moins que le 19 juillet nous étions en plein hiver.

ontée fulgurante de la mortalité immédiatement après le début de la vaccination es concernant la toxicité du "vaccin" de Pfizer.

ne comprend rien aux chiffres manifestement, continue comme suit article, il s'intéresse donc à lier l'augmentation des morts par le vaccin, qui induirait un autre truc idiot comme ça). Il aurait tué 40 fois plus dans la même période que le 19 juillet.

Alculent ça ? Facile on prend une période avec moins de morts (tous les mois de début décembre), qu'on compare au mois le plus meurtrier de la pandémie en Israël (septembre 2020 et sa méthodologie...).

Si on passe de 3,5 fois à 40 fois on sait pas trop comment – 40 fois ça voudrait dire

*50 en un mois à comparer avec la mortalité totale en Israël qui est de 45 000 . n'importe quoi donc)"*

puisque nous avons comparés les chiffres de mortalité a rien d'autre qu'au tableau par Ynet, sur lequel ils se sont basé pour démontrer l'efficacité du vaccin de Pfizer en que ce tableau parlait de comparaison sur 5 semaines.

ou ses élucubrations en disant pas moins:

*demment totalement débile d'utiliser VAERS pour les cas en Israël (pas la même sité, comorbidité...) ni les mêmes façon de vacciner selon les pays, ni les mêmes*

ait plutôt "débile" de ne pas comprendre qu' a été l'usage que nous avons fait des ers, les données américaines nous ont été utiles pour déterminer le rapport de la les ages du vaccin de Pfizer. Cette donnée n'est pas dépendante d'un pays kouts a de nouveau prouvé qu'il n'aurait jamais réussi les examens pour être ion, ne parlons pas d'y obtenir un diplôme.

Kouts qui a la technique du matraquage d'inepties pour fatiguer ses lecteurs e enfin au grand tableau de Ynet avec les données.

*3 ans 636 morts au total, mais surtout on voit que la grande majorité intervient dans ès la première dose. Cela prouve donc l'efficacité du vaccin (qu'il ne veut pas voir) it quoi ? Que le vaccin a tué 646 personnes et mis à l'hôpital 865 ! ation qui pour lui montre que c'est dû au vaccin pour l'hôpital"*

e comprend absolument rien a la mortalité du covid voit dans le fait que les morts s 13 jours suivant la première dose la preuve de l'efficacité du vaccin, grave erreur e le prouve les rapports du Vaers sur le vaccin de Pfizer les morts tombent en les 4 jours suivant le vaccin.

ts la mortalité normale de gens testés positifs au Covid est bien inférieur a 1% cela x de plus de 80 ans, alors que dans le tableau sur lequel vous aussi vous vous anter les mérites de Pfizer la mortalité globale est de 1.5 pourcent (660 pour 43871) e décrit durant l'interview les gens de plus de 80 ans qui représente 37% de la id en Israël n'y figurait pratiquement pas car vaccinés des la fin décembre et que le é du 10 février. De plus les 1251 malades graves ou critiques du tableau et qui font de l'échantillon de 43871 vaccinés vont eux aussi malheureusement fournir leurs mortalité supérieur a 20% d'entre eux. cela nous amenant a une mortalité sur les 43871 vaccinés soit au minimum 3 fois supérieur a celle de gens non nt les + de 80 ans alors que le tableau de Ynet ne les incluait pas.

ts fait abstraction des morts subites (cardiaques, AVC) suite au "vaccin" de Pfizer comptabilisées comme des décès Covid.

embrouille, Mr Kouts nous ramène au début de la video sur le VAERS et nous dis: *ance soir ils comparent les morts vaccins covid en janvier 2021 VS tous les autres ier 2020 - les 2 sans aucune base et source - enfin c'est pas clair et ils sont pas eux)"*

s supplémentaires que voila, alors que nous parlions du Vaers pour signifier e de décès rapportés en Janvier 2021 aux états unis pendant la vaccination de 456 décès sur 3000 rapports comparés a seulement 14 décès en Janvier 2020

similaires de rapports concernant des vaccins classiques.

Ari Kouts fait parti des innombrables Troll que je côtoie sur facebook diffusant de la au vu du nombre de Tweet mensonger de ce monsieur il me semble qu'il était : lui clouer le bec.

us laisse debunker les innombrables fautes d'orthographe et de ponctuation de ma n'excuserais mais vous ne valez pas la peine que je les corrige)

**ccupé a débunker ici l'article pseudo-scientifique du New England Journal of**

les concitoyens Israéliens ventant les qualités du « vaccin » Coco-vide de oui oui ceux la même qui avouent toucher des subventions de Pfizer pour « services a la science. Donc après avoir démontré avec le Dr [?] leur papier scientifique et aussi neutre et fiable qu'une pub de Pfizer nous [?] passer a Mr Soleil qui a lui aussi tenter de nous « éclairer » sur les mérites de l'ARN expérimentale de Pfizer (désolé de ne pas l'appeler vaccin mais notez [?] retenu par respect pour vous d'écrire poison ).

nence mal en traitant Nakim de « site avec des contenus à forte teneur [?] iste » Mr Soleil qui détient la vérité première qui lui a probablement été [?] Bill Gates en personne a appris l'hébreu et le droit israélien en deux temps [?] nts et s'est également spécialisé sur le sujet de la corruption en Israël et du [?] inie nullement égalé s'est déjà permis de jauger les actions juridiques et [?] IM à la cours suprême en Israël cités maintes fois par la presse israélienne et [?] de conspirationniste a deux balles... bon ok avec le Soleil on ne discute pas...

baissé le support c'est au tour des auteurs :

« [?]illet, Haim Yativ, se présente comme un ingénieur » je ne me présente pas [?] ingénieur dommage de ne pas avoir lu avant ma réponse a votre collègue Ari [?] ingénieur et diplômé de pas n'importe quelle école un petit coup d'œil au [?] tous votre altesse...

« [?]eligmann il n'est pas un médecin distribuant des médicaments comme le [?]eil mais c'est un biologiste chercheur ayant publié plus de 100 articles [?]t ayant travaillé des années chez le Prof Raoult, bref a la pointe dans le [?] »

nue donc bien lancé avec ses inepties et nous raconte des « histoires de [?]ange » :

« [?]endant, c'est qu'il compare des pommes avec des oranges : le nombre de [?] un état grave est un « instantané » qui ne concerne qu'une seule journée alors [?] de Ynet cumule des cas survenus sur une assez longue période (au moins [?] s, voire plus). Pour s'en faire une idée, on n'a qu'à songer au fait que le [?]t fait état de 660 décès alors que la COVID-19 tue environ 35 personnes par [?] mois. On ne peut donc absolument rien tirer d'une telle comparaison. »

t ce qui l'arrange a apparemment omis dans l'article la phrase :

« [?]ose we need first to understand that the provided table describes the state of [?]ents that got the first or the second vaccine dose at given dates, as started in [?] emerges from the data that among 856 patients above 60 years in serious [?]zed at this time..." we assume that the article published February 11 reflects [?] hospitals the previous day, hence February 10 2021, or February 11 2021." »

« [?]is décrit donc clairement le nombre de gens hospitalisés a la date de l'article [?]ilé comme le prétend Mr Soleil, en cas de doute Mr Soleil qui comprend si [?]omme dit plus haut aurais pu se pencher sur la version israélienne qui est [?]aet » est en hébreu a l'instant présent.

« [?]mbre de décès il est bien évidemment accumulé comme nous l'avons bien [?]rticle.

« [?]re de lui Mr Soleil s'arme de chiffre de la banque mondiale pas moins (dis moi [?]te je te dirais qui tu es...) pour nous dire que la mortalité de 0.05% pour 5 [?]à peine plus élevé que la mortalité attendue de 0.048% »

ne oublie notre prétendu critique scientifique c'est notre phrase: " This death mainly to a relatively young population whose vaccination stated on January 19, 2021, of which most vaccinated were below 65."

Donc pourquoi ce chiffre de mortalité est excessif puisque la part du lion de la mortalité israélienne comme dans tout autre pays est composée des gens de plus de 65 ans et ce n'est pas le cas.

En fait, essentiellement la mortalité de 0.5% par an ramenée par Mr Soleil est la mortalité naturelle cause confondue incluant suicide accident de voiture cancers, attaque cardiaque, etc. Autre, alors que l'année passée la part du Covid dans cette mortalité était de 10%. Tant et si bien qu'une mortalité due au Covid qui dépasse la mortalité naturelle sur cette période de 5 semaines et cela pour une écrasante majorité de gens de plus de 65 ans cela est une CATASTROPHE.

Comme nous l'avons vu avec ses élucubrations sous le titre « –la pire vague » expliquant que la mortalité en décembre à février est juste causée par la monte des cas Covid. Et pour la lumière émanant du cerveau de Mr Soleil, nous avons débunké son article sur [The New England Journal Of Medicine](#) et au passage nous avons glané la preuve de nos propres données. La première injection de Pfizer multiplie par 3 le nombre de décès causés par les maladies Covid chez les vaccinés. Maintenant que je vous ai mis à l'ombre Mr Soleil, j'invite à lire [notre article](#), puisque faute d'emploi vous aurez tout le temps de vous excuser d'avoir encouragé les gens à se faire vacciner avec ce produit plus dangereux que le Covid.

En attendant que votre verdict vous savez maintenant quoi en faire au vu de [notre](#)

[document scientifique](#) sur lequel le ministère de la santé israélienne et vous-même vous vous

avez basé. [J'ai](#) également [ajouté pas votre collègue de MSN](#) [l'ai démonté dans sa langue, plus bas](#)

ie

concern about the safety of Covid-19 vaccines faces derision as an 'anti-vaxxer', 'remists are those who refuse to hear evidence that something is going badly wrong experimental intervention. Now a Public Health England <https://www.gov.uk/news/new-data-show-vaccines-reduce-severe-covid-19-in-older-adults>

; that infections increase during the fortnight after vaccination

ion programme began in earnest in January, worrying signs came from care homes, the initial target population of people aged over 80 reside. At Pemberley House in third of the residents (24) died of Covid-19 in a home that had previously been free se. Similar reports emerged from Germany

dications came from small countries that strove to vaccinate their entire adult : British enclave of Gibraltar was supplied with the Pfizer vaccine on 16th January were swiftly jabbed. Suddenly this tiny state, home to 33 thousand, had the worst ity in the world (now 2761 per million). From merely 9 deaths in December, now æd have died. The health minister angrily denied claims that the vaccine was killing æntually admitted that some deaths had occurred in recipients

b Emirates received large batches of the Chinese Sinopharm vaccine as well as the n December. As stated by Amer Sharif, head of the Covid-19 Command & Control i, the UAE aimed to be the first country in the world to achieve 100% vaccination of An increase in deaths was attributed to mutant strains, but as in other countries the :portionately in the vaccinated age band. On 10th February a new daily high of 18 : coronavirus was recorded, and the trend has continued. Considerably more people in the first wave last spring – despite the hubristic inoculation

of iatrogenic harm came from Israel, which started vaccinating on 19th December. former New York Times journalist Alex Berenson, while Covid-19 mortality g Israelis throughout January, in Palestine it declined steeply after a surge in the Palestinians had no vaccine

is more than coincidental. Analysis [http://www.nakim.org/israel-forums/t=270812&s=The\\_uncover\\_vaccination\\_data\\_in\\_Israel\\_reveals\\_a\\_frightening\\_picture](http://www.nakim.org/israel-forums/t=270812&s=The_uncover_vaccination_data_in_Israel_reveals_a_frightening_picture)

ministry data by Hervé Seligmann at Aix-Marseilles University indicates that about ælderly people died of Covid-19 in the three weeks between their first and second ong those who were not vaccinated. Sacrificial lambs? Deaths in Israel are now oliticians and media attribute to the vaccine, although there is a global trend of the j less deadly

plication has a temporal pattern that varies between countries, apparently /hen vaccination started. Jordan was supplied with 3800 tons of Sinopharm on 9th pproval for 'emergency use'. The King of Jordan and other prominent figures were ision receiving the vaccine, to encourage the people to follow. A deal was also illion doses of the Pfizer product. At this time nearly four thousand had died of

February half a million had been jabbed, but this was slow progress in a land of ten ñile coronavirus cases had surged, as had deaths. A night curfew was imposed. Yet ying were in the age group prioritised for the vaccine; many would have had the -saving substance. Yesterday another 37 died, and the death toll is now /e thousand. Perhaps that explains hesitancy in the Hashemite kingdom

unexpected that Covid-19 vaccines have deleterious as well as intended effects. ws significant lymphocyte depletion in the first week after vaccination. June Raine,

medicines regulator MHRA, acknowledged that 'a week or two' is needed to build ter the first jab

lth England study, which was hailed by health secretary Matt Hancock for the ecrease in hospitalisations, actually showed a 48% rise in infections after the first ind Astra Zeneca vaccines. The authors, however, blamed this on a higher risk of ' Ramsay, head of immunisations at PHE, stated that 'this adds to growing evidence s are working to reduce infections and save lives'. She glossed over the hundreds getting the jab

y be happening. Vulnerable people who unknowingly had Covid-19 or whose o was keeping it at bay, succumbed to the disease after the vaccine lowered their irus struck hard, leading to sever symptoms, cytokine storm and pneumonia. It is rat previously shielding persons were cross-infected by the vaccinators

oer scrutiny, not reckless denial by those who are meant to protect us. This and censorship is how the thalidomide scandal arose. The authorities have aside everything we have learned about ethical safeguards in clinical and eatment. Perhaps it is relevant that the British medicine regulator is heavily funded elinda Gates Foundation

tors raising the alert? In medical training, hardly a day is given to learning about igit Pharma has undue influence on this noble profession. With critical thinking and y the Covid regime, most doctors are mere conformists. We must appeal to the cs to continue their efforts to expose the deadly hazard of this highly dubious

[wsnetwork.co.uk/british-and-israeli-government-data-con firm-covid-19-vaccine-risk- /infections-increase-in-fortnight-after-jab](https://www.bbc.com/news/health-56841111)

of **Jean-François Cliche and**  
**ey, taking the sun/LeSoleil straight to the shadow**

ing try for nakim.org , and this time from Mr Soleil/Sun (Jean-François Cliche). Also attached below in PDF in case Mr Soleil and Bill Gates' MSN/Dan retract...) As I wrote with Mr. Kouts above when it comes to public health I am : Soleil sorry for what follows.

הצטרף: 23 ינו' 2006  
הודעות: 914

ight away because I was busy and it was very good for me because Mr. was picked up, guess by whom? by MSN network yes !!! !!! the Microsoft

**f B I L L G A T E S!!! with one stone two birds!**

debunking [here the pseudo-scientific article of the New England Journal of](#) y fellow Israelis touting the qualities of Pfizer's Coco-vid "vaccine", yes yes to admit receiving grants from Pfizer for their "good and loyal" service to

g demonstrated with Dr Seligmann that their scientific paper is as neutral and Pfizer ad, we can finally move on to Mr Soleil who also tried to "enlighten" us of the experimental RNA injection from Pfizer (sorry not to call it a vaccine but of respect for you I refrained from writing poison).

s badly by treating Nakim as a "site with high conspiracy content" Mr. Soleil primary truth which was probably transmitted to him by Bill Gates in person w and Israeli law in two days and has also specialized in the subject of srael and from the height of his unparalleled genius has already taken the ing the legal and other actions of NAKIM at the Supreme Court in Israel cited r the Israeli press and to treat us as a double-barreled conspirator ... well, ok ve don't argue ...

the medium, it's the authors' turn: "The author of the post, Haim Yativ, elf as an engineer" I do not present myself as an engineer too bad not to have y answer to your colleague Ari Kouts, I am an engineer and a graduate of not l but the Technion, a little glance [above at my Kouts debunking your](#)

mann, he is not a doctor distributing drugs as Mr Soleil conceives, but he is a gist who has published more than 100 scientific articles and who worked for f Didier Raoult, in short at the cutting edge in the field.

efore continues well with his ineptitude and tells us "stories of apple and problem, however, is that he compares apples with oranges: the number of ious condition is a 'snapshot' which concerns only one day while the Ynet ates cases that have occurred over a fairly long period (at least two weeks, or o get an idea, one only has to think of the fact that the Ynet table shows 660 /ID-19 has killed around 35 people a day for the past month. So absolutely e drawn from such a comparison. "

reads what suits him, apparently omitted from the article the sentence: "For ve need first to understand that the provided table describes the state of ents that got the first or the second vaccine dose at given dates, as started in merges from the data that among 856 patients above 60 years in serious zed at this time... "we assume that the article published February 11 reflects 1 hospitals the previous day, hence February 10 2021, or February 11 2021."

efore clearly describes the number of people hospitalized at the date of the accumulated as claimed by Mr. Soleil, in case of doubt Mr. Soleil who ebrew so well as said above could have looked into the Israeli version which eal "kaet" is in Hebrew at this day.

ber of deaths, it is obviously accumulated as we have described in the

himself, Mr Soleil is armed with data from the World Bank no less (tell me who would tell you who you are ...) to tell us that the mortality of 0.05% for 5 y higher than the expected mortality of 0.048% The parameter that our alleged : forgets is our sentence: "This death rate relates mainly to a relatively young ose vaccination stated on January 19, a period during which most vaccinated ." So that explains why this death figure is excessive since the lion's share of ael as in any other country is made up of people over 65 and not the other

I essentially the mortality of 0.5% per year reported by Mr Soleil is the overall all causes including suicide, car accident, cancer, heart attack and other, the share of Covid in this mortality was far less than 10%. at a mortality from Covid which exceeds the usual general mortality over this eks and that for an overwhelming majority of people under the age of 65 this OPHE.

gues with his rantings under the title "- the worst wave" explaining that the rtality in December to February is just caused by the rise in Covid cases. re light emanating from Mr. Sun's brain, we debunked the New England dicine article and in the process gleaned evidence for our claims from their first injection of Pfizer multiplies by 3 the number of Covid patients among l.

e put you in the shade Mr Soleil, I invite you to read [our article](#), since for lack t you will have all the time to think about your acts of having encouraged accinated with this product more that worrying.

our final and your verdict Mr Jean-François Cliché aka Mr Soleil, you now do with it given [our debunking of the scientific article](#) you, Bill Gates' MSN, and the Israeli Ministry of Health rely on.

ur peer Dan Satherley who wrote in addition to your false claims:

1 in the post is that deaths from COVID-19 in Israel are now slowing because n campaign is "losing its momentum". This is demonstrably false - since mid-umber of people dying from COVID-19 each day has more than halved, while ita shows the number of doses administered in Israel has continued its ory over the past two months, with no signs of slowing down."

eems as well specialized in disinformation since we wrote in feb 15.2021: in vaccinations and in vaccination age will cause a decrease in serious

nuary it start getting down because from mid january the 65 and below start h the pfizer RNA experimental product.

ok to what happens since our article in Israel we can see that there was a rious case of 30 percent that match the decrease of the first shot vaccination

rious case from 1008 on feb,15 2021 to 710 on march,6 2021

**the vaccination on last 3 weeks  
is the first shot**

**LeSoleil/Jean-François Cliche+Msn/Dan Satherley=Bill Gates=FAKE NEWS  
people to take the shot.**
